

Lifecasting with Ovi

Share memorable moments with your Facebook friends

Ovi allows you to lifecast your real life location and what you're up to to your Facebook friends in a fantastic new way. Publishing not just your location by coordinates and address, but also by the semantic name of the place you lifecast from – with links to the location and map on Facebook so friends are able to read your status updates and join the conversation.

How to use lifecasting with Ovi:

- 1. Add the home screen widget:** You can start lifecasting directly from the home screen of your Nokia N97 mini. Simply download the widget and then add it to your home screen.
- 2. Select where you are:** Your Nokia N97 mini detects your real life location via GPS/A-GPS or network positioning. You may share the street address you are at or a meaningful place from the nearby points of interest (POIs) or a favorite place saved on your Ovi Maps^{Beta}.
- 3. Enter your status:** With lifecasting you can also let others know what you are up to.
- 4. Attach a photo:** To capture the moment and make it more memorable, you can also take a photo and share it with your friends.
- 5. Go to Facebook:** Open your Facebook profile and see what you are lifecasting. Check out if your friends have left any comments and keep the conversation going.

Ovi is going to let you lifecast your life in a fantastic new way. You can download the lifecasting with Ovi widget from Nokia Betalabs at betalabs.nokia.com
